DETAILED ACTION

1. This Non-Final Office action is in response to the application filed on January 21st, 2004 and in response to the applicant's arguments/amendments filed on May 8th, 2009. Claims 1-7, 9-26 and 28-42 are pending.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 8th, 2009 has been entered.

Response to Arguments

3. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

For sake of compact prosecution Examiner would like to point out that in response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., real time renegotiation of a financial instrument) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26

USPQ2d 1057 (Fed. Cir. 1993). Examiner urges Applicant to amend the independent claims to incorporate this feature, since as the claims stand now, only automation of a manual process is taking place. Examiner notes, that Applicant has shown that the automation of the process results in further benefits (eliminating rate variance and enabling disabling a selection of renegotiation options based upon a balance of the financial instrument that has expired), and therefore, Applicant needs to incorporate those features upon which their response relies.

Examiner further urges Applicant to contact the Examiner if further clarification is necessary.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. Examiner notes that the system incorporates a server and program elements. The omitted elements are a computer readable medium configured to perform the method steps instead of just the program elements.

Claims 23-26 and 28-42 are dependent from claim 22 and are rejected under the same reasoning stated above.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1-7, 9-26 and 28-42 are rejected under 35 U.S.C. 101 because the claimed invention is not directed to a secondary statutory subject matter/class.

Based on Supreme Court precedent and recent Federal Circuit decisions, the Office's guidance to examiners is that a § 101 process must be (1) tied to another statutory class (such as a particular apparatus) or (2) transform underlying subject matter (such as an article or materials) to a different state or thing. If neither of these requirements is met by the claim, the method is not a patent eligible process under § 101 and should be rejected as being directed to non-statutory subject matter. Merely having "another statutory class" in the preamble and not in the body of the claim is also not sufficient to render the claim statutory.

An example of a method claim that would not qualify as a statutory process would be a claim that recited purely mental steps. Thus, to qualify as a § 101 statutory process, the claim should positively recite the other statutory class (the thing or product) to which it is tied, for example by identifying the apparatus that accomplishes the method steps, or positively recite the subject matter that is being transformed, for example by identifying the material that is being changed to a different state.

Here, applicant's method steps fail the first prong of the new Federal Circuit decision since they are not tied to a machine and can be performed without the use of a particular machine. In this particular case, claims 1-7, and 9-21 are not tied to another

statutory class, such as hardware. Thus, it is unclear as to whether or not the claims are mere processes that involve purely human labor.

Here, applicant's method steps fail the second prong of the new Federal Circuit decision since there is not transformation of subject matter. In this particular case, claim 1 and claim 22 only teaches displaying and transmitting steps (no processing). Examiner notes that an amendment to claim 1, incorporating the limitations of claim 4 and incorporating a real time renegotiation allowing for decreased rate variance would obviate this rejection of the second prong, and would better claim the invention as submitted.

Claims 23-26 and 28-42 are dependent from claim 22 and are rejected under the same reasoning stated above.

Appropriate correction is required.
